

Legal Services

We offer well-diversified legal services to domestic and foreign individuals, small and medium-sized companies as well as Swiss companies of international corporations. Our pragmatic approach turns your individual goals and visions into practical solutions.

How We Assist You

The increasing regulatory density in domestic and international law leads to a decline in clarity and planning predictability. We identify the relevant legal framework and highlight the available room for manoeuvre.

From arranging personal legal affairs to joint ventures or company mergers, from establishing a company to succession planning: we provide the optimal solution for you, draft the necessary contracts and documents and negotiate on your behalf with third parties, whether private, business or authorities.

Your Advantages

We analyse your current situation from different perspectives and collaborate, where necessary, closely with our experts in the fields of tax, trust and asset management services. In addition to our in-house experts we have access to a domestic and international network of specialists.

As your long-term partner we strive for simple, understandable and practicable solutions which will continuously be adjusted to your personal goals. We take care of your legal matters, so that you can focus on your key concerns.

Our Services

We advise and assist you primarily in the areas of contract law, family, matrimonial property and inheritance law, commercial and corporate law, financing, reorganisation and insolvency law, property law as well as labour and social security law.

Private Clients

- Succession and estate planning for individuals and families. Drafting marriage and inheritance contracts, wills, cohabitation agreements, advance care directives and living wills. Acting as an executor, inheritance administrator or representative of the heirs.
- Advising and assisting entrepreneurs regarding business succession planning, business sales, share and asset transfers, partnership models, shareholders' agreements and joint venture projects.
- Advising and assisting individuals planning to enter into self-employment, such as on the choice of legal form, business seat and financing.
- Advising on and assisting in buying and selling real estate.
- Identifying and monitoring legal risks in projects.
- General legal advice in other fields of law such as debt enforcement, retirement and pensions law.

Corporate Clients

- Advising on and assisting in the incorporation of affiliated companies and branch offices.
- Advising on and assisting in Mergers and Acquisitions, as well as in connection with debt and equity financings, restructurings and relocations.
- Advising on and assisting in buying and selling real estate.
- Identifying and monitoring legal risks in projects.
- Providing contract and document management services and corporate housekeeping services.
- Advising on and assisting in other fields such as regarding insolvencies and debt enforcement proceedings, employee participation programs, employment contracts and general terms and conditions
